phthalic acid 216
phthalic anhydride 216
pK_a values 751
PM3 MO 115
polar effect 809
polarizability constants 485
poly(alkylmethyldiallylammonium halides) 305
polyelectrolytes 305
polyenic oligomerics 853
polymer chemistry 602
polymers 589
polysoaps 305
primary alcohols 697
protein monolayer interactions 546
proteins 693
proton affinity 857
proton binding 519
proton donors 715
proton transfer 632, 737, 903
pseudophase model 584
pyranine 743
pyrenyl–DNA complexes and adducts 561
pyridine basicity 495
2-pyrimidylnitrenium ion 478
pyrolysis initiation reactions 177

quantum tunnelling 879
quantum yield 79
quartz crystal microbalance 546

radical bromination 685
radical chemistry 529
rate enhancement 455
rate prediction 632
reactant–solute encounters 841
reaction mechanism 54, 133, 201
reactivity 91, 362
reactivity–structure correlations 467
redox switch 546
reducing conditions 529
resonance demand 495
rhodium(II)-catalyzed nitrene transfer 597
ring inversion 475
ruthenium (II) complexes 566, 577
ruthenium (III) catalysis 171

σ-complexation 707
Sadlej's basis set 485
secologanin 622
secondary alcohols 697
securinine 209
selective arylation 478
semi-empirical calculations 411
semi-empirical methods 781
short-lived reaction intermediates 292
silacycloheptatriene 475
single-crystal x-ray diffraction 91, 895
slow-binding inhibition 793
sodium alkylsulphates 59
sodium salt 109
solute–solvent interactions 185
solvation 283
solvatochromic indicators 185
solvatochromism 743
solvatophobic interactions 426
solvent composition 847
solvent effects 193, 261
solvent polarity parameters 743
solvent–solute interactions 193
solvent–solvent interactions 185
solvolysis 223, 273, 871
spectroscopy 589
spin-delocalization effect 809
stability 756
stereodynamics 84
stereospecific 101
strand cleavage 561
structural dependence 157
structure 91, 125, 895
styrene derivatives 79
substituent effect 495, 857
1-substituted 2-pyrrolidinones 261
substituted 1,3,5-triaminobenzenes 731
substituted triphenylamines 731
sugar isomerization 512
sugar phosphate isomerization 512
sulfonium ylides 321
sulfuric acid 803
supercritical fluids 589

superelectrophile 707
supersolvent 847
synthesis 125

targeted DNA sites 566
tautomerism 392, 411
tautomerization 519
tetracyanoethylene 15
tetrahydrothiopyrans 831
tetrazolo[1,5a]pyrimidine 478
theoretical estimation 437
theoretical study 392, 670
thermochromism 737
thermodynamics 36
thioamide 701
1,2,5-thiadiazole 91
1,2,5-thiadiazole 1,1-dioxide derivatives 489
thiophenoxides 115
through-bond and through-space interactions 871
p-toluenesulfonyl photoremoval 618
transesterification 109
2H transfer processes 879
transition states 519
1,1,1-trihalo-2,2-bis(dimethoxyphenyl)ethanes 54
trinitro aromatics 787
triplets 819

UHF–SCF–AM1 MO method 177
unsaturated nitriles 715
urea 109
UV spectra 809
UV–visible spectrophotometry 895

vicarious nucleophilic substitution 341
vincoside derivatives 622

water 610, 841
water structure 185

x-ray analysis 426

p-Y-substituted benzaldehyde 2, 4-dinitrophenylhydrazones 809
p-Y-substituted benzaldehyde 4-nitrophenylhydrazones 809
p-Y-substituted benzaldehyde *N*-phenylsemicarbazones 809
p-Y-substituted benzaldehyde phenylhydrazones 809
p-Y-substituted benzaldehyde semicarbazones 809
Yukawa–Tsuno equation 254, 495, 857
Y_{xBnCl} scale 223

zero field splitting parameter, *D* 819
zinc ion binding 519
